Place : TB 250, Boğaziçi Üniversitesi

Abstract: In this talk, I will describe Legendrian surgery diagrams for canonical contact structures on the links of certain rational surface singularities. Also I will describe an infinite family of contact 3-manifolds so that the Milnor genus (resp. Milnor norm) is strictly greater than the support genus (resp. support norm) of that canonical contact structure, for each member of this family.

Tea and coffee will be served at 15:00
