**KONUŞMANIN BAŞLIĞI: Groupoid of Orientation Twists**

**KONUŞMANIN ÖZETİ:** This is an essay to define a higher modular groupoid. The usual modular groupoid admits ideal triangulations of surfaces of fixed genus and punctures as objects and Whitehead moves as morphisms. The higher groupoid of orientation twists admits usual modular groupoids as its objects.

Tarih: 16 Nisan 2010 Cuma

Saat: 15:30 – 16:30

Yer: Matematik Mühendisliği Bölümü B-303 (FTS)
