**General Relativity 1915-2015; A Brief History of
Gravitation and Einsteins Theory**

Abstract. One hundred years ago Einstein delivered the first details of his general theory of relativity theory in Berlin. It was published in 1916, in surprisingly full form, in the Annalen der Physik. This theory of gravitation is still the best one available and follows that of Newton over two centuries earlier. This talk will give a brief journey through the history of science relevant to gravitation from the earliest times to the present.

Tarih: 8 Mayıs 2015 Cuma

Yer: Fen-Edebiyat Fakültesi Toplantı Salonu, 3. Kat

Saat: 14:00-15:00
