İSTANBUL ANALYSIS SEMINARS

INTEGRAL OPERATORS AND ANALYTIC OR HARMONIC FUNCTIONS

Grigore Ştefan SĂLĂGEAN

Babeş-Bolyai University
Faculty of Mathematics and Computer Science

Abstract: We present some recent results concerning generalizations of Alexander, Libera, Bernardi, Pascu, Breaz integral operators defined on certain classes of analytic functions or harmonic functions. Properties of univalence, starlikeness, convexity are obtained using different methods of proof.
